Vibra Hospital of Richmond (formerly Kindred Hospital) is an acute care hospital that specializes in the treatment and rehabilitation of medically complex patients who require an extended stay in a hospital setting. 95% of patients come from short-term acute care hospitals. The hospital treats critically ill, medically complex patients who suffer from multiple organ system failures - active disorders of many parts of the body. These conditions include cardiopulmonary disorders, wounds, kidney diseases, complex infections, and neurological disorders such as head and spinal cord injury and stroke. Because they are medically complex, our patients often are dependent on technology, such as mechanical ventilators, total parenteral nutrition, respiratory or cardiac monitors and dialysis machines for continued life support. At our hospitals, we strive to help our patients recover through a carefully orchestrated multidisciplinary team approach.

Interdisciplinary team is led by the attending physician and includes nurses, pharmacists, nutritionists, occupational therapists, speech and language pathologists as well as physical therapists.
