I Click, I Talk is for all ages, all communication disabilities and all languages. I Click, I Talk is software application to monitor language development by tracking the frequency of usage for each image.

Software can run on i-Phone, ipod Touch and iPad. It can be installed on your laptop and/or desktop.

I Click, I Talk is flexible; you can insert different types of pictures such as photographs, logos, drawings and even written words; your voice can also be added.

Staff can design and develop technology solutions that are low tech, medium tech and high tech. Upon request, information about types of technology that best fit your situation can be offered. Call about training opportunities.
