Pulmonary Services at Bedford Memorial Hospital are provided through the Pulmonary Clinic, the Difficult Airway/Lung Mass Clinic, Intensive Care Units and Sleep Centers. The department has several areas of specific interest. These include Asthma, COPD, Pulmonary Hypertension, Difficult Airway Management, Bed-side Ultrasonography, Sleep Disordered Breathing and Interstitial Lung Disease among others.

Diagnostic services include:

- Spirometry
- Lung volume studies (measuring lung capacity to determine if there is impaired function)
- Diffusion capacity studies
- Bronchial challenge testing
- CAP accredited Blood Gas Laboratory (available through Carilion Labs)
- Nocturnal oximetry studies
- Pulse oximetry
- Screening to qualify patients for home oxygen

Therapy services include:

- Oxygen and aerosol therapy
- Airway clearance therapy
- Mechanical ventilation
- Non-invasive ventilation
- Oximetry/end tidal CO2 monitoring
- Bronchodilator therapy
