Hospice treatment emphasizes pain management, symptom control, comfort measures and quality of life.

The hospice philosophy seeks to allow terminally ill persons to be at home, close to family and friends, while still under professional medical supervision. Physicians, nurses, social workers, spiritual counselors, volunteers, aides and therapists are available to the patient. We bring our care to you-in your home, a long-term care facility, assisted living or a hospital when short-term inpatient care is needed.
